

CONTENTS OF VOLUME 34

Number 1

The Use of Soft Systems Methodology to Improve the Adoption by Australian Cotton Growers of the Siratac Computer-Based Crop Management System	1
R. MACADAM, I. BRITTON, D. RUSSELL, W. POTTS, B. BAILLIE & A. SHAW (Australia)	
Simulation of Gum Naval Stores Production Systems	15
ALAN W. HODGES & W. DAVID SHOUP (USA)	
A Decision Support Model to Evaluate the Effects of Drought and Stocking Rate on Beef Cattle Properties in Northern Australia	37
PETER GILLARD & RICHARD MONYPENNY (Australia)	
Recursive Stochastic Programming Applied to Dairy Cow Replacement	53
B. L. HARRIS (New Zealand)	
Integration of Seed and Plant Kill Tactics for Control of Wild Oats: An Economic Evaluation	65
SUSHIL PANDEY & R. W. MEDD (Australia)	
A Comparison of Development Options on a Northern Australian Beef Property	77
B. D. FORAN, D. M. STAFFORD SMITH, G. NIETHE, T. STOCKWELL & V. MICHELL (Australia)	

Number 2

Modelling Reproductive Management Systems for Beef Cattle	103
SARA MELIN AZZAM, J. E. KINDER & M. K. NIELSEN (USA)	
The Application of Open and Closed Systems Theory to Change in Agricultural Institutions	123
J. E. HOLT & D. SCHOORL (Australia)	
A Multiple Objective Land Use Planning Model for Nepalese Hills Farms	133
KESHAB M. SHAKYA (Nepal) & WILLIAM A. LEUSCHNER (USA)	
Linking Research to Extension in the Southern Highlands of Papua New Guinea: The Problems of a Modified Farming Systems Approach	151
ROBERT CRITTENDEN & DAVID A. M. LEA (Australia)	

Evaluating SPUR Model for Predicting Animal Gains and Biomass on Eastern Hill Land Pastures	167
W. L. STOUT, L. C. VONA, J. W. SKILES, J. A. SHAFFER, G. A. JUNG & R. L. REID (USA)	
Book Reviews	179

Number 3

Regression of a Model on Real-System Output: An Invalid Test of Model Validity S. R. HARRISON (Australia)	183
Forecasting Victorian Fleece Weights Using a Climatic Pasture Index . . . I. SHAW & C. J. FINDLAY (Australia)	191
An Evaluation of a FSR/E Project: Costs and Benefits of Research and Extension R. QUENTIN GRAFTON, EDWARD B. WALTERS & MICHAEL K. BERTELSEN (Haiti)	207
Deviant Organisations in Development: A Review of Theories of Intervention . P. J. SMITH (UK)	223
A Survey Method to Characterise Spatial Variation for Rural Development Projects	237
SIMON E. CARTER (Colombia)	
Developing Efficient Extension Strategies: Results of an Experiment Involving Costa Rican Livestock Producers.	259
JONATHAN WADSWORTH (UK)	

Number 4

Simulation of Hay-Making Systems: Part 1—Development of the Model . . .	277
M. L. GUPTA, T. A. McMAHON, R. H. MACMILLAN & D. W. BENNETT (Australia)	
Simulation of Hay-Making Systems: Part 2—Application of the Model . . .	301
M. L. GUPTA, R. H. MACMILLAN, T. A. McMAHON & D. W. BENNETT (Australia)	
Simulation of Meteorological Data for Use in Agricultural Production Studies .	319
LARRY W. VANTASSELL, JAMES W. RICHARDSON & J. RICHARD CONNER (USA)	
Goal Programming for Estimating Initial Flux of Insect Pests	337
L. G. BROWN, R. W. McCLENDON & K. S. AKBAY (USA)	
Economic Analysis of Soil Erosion Effects in Alley Cropping, No-till and Bush Fallow Systems in South Western Nigeria	349
S. K. EHUI, B. T. KANG & D. S. C. SPENCER (Nigeria)	
Book Reviews	369

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion (United Nations 1994).

There is a growing awareness that the needs of children are not being met in many parts of the world. The United Nations Children's Fund (UNICEF) has estimated that 100 million children are malnourished, 100 million are illiterate, 100 million are in need of shelter, and 100 million are in need of health care (UNICEF 1994). The United Nations Development Programme (UNDP) has estimated that 1 billion children are in need of basic services (UNDP 1994).

There is a growing awareness that the needs of children are not being met in many parts of the world.
